Scenarios - What Would You Do?

Work with a partner to read the scenario and then decide how you would handle the situation.
Scenario 1

You and your best friend have always played soccer together on recreational teams. You both try out for the school team and you make it, but your friend doesn’t. At first your friend claims not to care, but you can tell your friend is upset. Your friend doesn’t want to spend as much time together as you used to, and you have daily practices and games. What do you do?
Scenario 2

Your friend tells you a secret in absolute confidence. You don’t really mean to, but you tell another friend. Soon the whole 6th grade seems to know your friend’s secret. Your friend is really mad at you and your other friends are also mad you told the secret. What do you do?
Scenario 3

Your parents have a strict rule that all homework must be done before you can go out after school with your friends. All of your friends are going over to another friend’s house to hang out after school and want you to go. What do you do?
Scenario 4

You are invited to go to Target and lunch with a new group of friends from school. You don’t know them that well, but are excited that you were included in their plans. When you go to Target you think you see one of them slip a CD into a pocket without paying. What do you do?
Scenario 5

Your teacher asks you to stay after class. She shows you two tests that are identical in every answer: yours and the student's who sits next to you. You have just become friends with this student. You know that you did not cheat, so you suspect that the other student may have. What do you do?
Scenario 6

Your middle school is much bigger than your elementary school. There you saw your best friend all the time, but now you don’t have any classes together and hardly see each other except for at lunch. Your friend seems to be making a whole new group of friends that you do not know. Today at lunch your friend is sitting with them and when you walk by, your friend does not ask you to sit down as usual. What do you do?
Scenario 7

A girl in your math class posts a picture on Instagram. Your friend and this girl do not get along. Your friend posts a rude comment on the IG picture and tells you to do the same. You don’t have any problem with the girl in your math class. What should you do?
